Part 1 : Introduction	1
Part 2 : The Project	11
Part 3 : Environmental Assessment Methods	25
SECTION 2 : ENVIRONMENTAL TOPICS	
Part 1 : Air Quality	37
Part 2 : Cultural Heritage	57
Part 3 : Disruption Due to Construction	111
Part 4 : Ecology and Nature Conservation	139
Part 5 : Landscape Effects.....	195
Part 6 : Land Use	225
Part 7 : Traffic Noise and Vibration.....	261
Part 8 : Pedestrians, Cyclists, Equestrians and Community Effects.....	273
Part 9 : Vehicle Travellers.....	303
Part 10 : Road Drainage and the Water Environment	317
Part 11 : Geology and Contamination.....	353
Part 12 : Soils and Agricultural Land Quality	363
Part 13 : Impact on Policies and Plans	381
SECTION 3 : CUMULATIVE EFFECTS AND ALTERNATIVES	
Part 1 : Cumulative Effects	403
Part 2 : Alternatives Considered	427
SECTION 4 : CONCLUSIONS	
Part 1 : Summary of Mitigation Measures.....	439
Part 2 : Summary of Effects of the Scheme.....	443

SECTION 5 : REFERENCES AND GLOSSARY

Part 1 : References

Part 2 : Glossary

SECTION 6 : APPENDICES

Appendix A List of Figures in ES Volume 2

Appendix B List of Technical / Survey Reports

Appendix C Appraisal Summary Table, October 2005

Appendix D Appraisal Summary Table, December 2008

Appendix E Summary Draft Construction Programme

Appendix F Note of Consultations with Statutory Environmental Bodies and other Environmental Consultees

SECTION 7 : NON-TECHNICAL SUMMARY

FIGURES :

LOCATION PLAN (in Section 1 Part 1, on page 2)

ENVIRONMENTAL MASTERPLAN (folded into the back of this volume)

[All drawings and other figures referred to are located in the ES Volume 2 : Figures]

TABLES

Section 1: Introduction

Table 1.2.1 Traffic Flows AADT with HGV%

Table 1.2.2 AST Sub-Objectives of Relevance to the Environmental Requirements of the Scheme Brief

Table 1.3.1 Environmental Value (or Sensitivity) and Typical Descriptors

Table 1.3.2 Magnitude of Impact and Typical Descriptors

Table 1.3.3 Descriptions of Significance of Effects

Table 1.3.4 Arriving at the Significance

Table 1.3.5 Questions to Aid the Description of Significance of Cumulative Effects

Section 2 Part 1: Air Quality

Table 2.1.1 Results of NO₂ Diffusion Tube Survey

Table 2.1.2 2012 Predicted Annual Average Nitrogen Dioxide Results (as µg/m³) Within the A453 Corridor

Table 2.1.3 2012 Predicted Annual Average Nitrogen Dioxide Results (as µg/m³) Beyond the A453 Corridor

Table 2.1.4 2012 Predicted Annual Average PM₁₀ (as µg/m³) Results at all Receptors

Table 2.1.5 Regional Air Quality Appraisal

Table 2.1.6 Greenhouse Gas Appraisal

Section 2 Part 2: Cultural Heritage

Table 2.2.1	Environmental Value and Typical Descriptors
Table 2.2.2	Magnitude of Impact and Typical Descriptors
Table 2.2.3	Summary of Assessment of Archaeological Remains
Table 2.2.4	Summary of Assessment of Historic Buildings
Table 2.2.5	Summary of Assessment of Historic Landscapes

Section 2 Part 3: Disruption due to Construction

(there are no tables in Section 2 Part 3)

Section 2 Part 4: Ecology and Nature Conservation

Table 2.4.1	Consultees Contacted and Details of Data Requested
Table 2.4.2	Sites of Special Scientific Interest within 2km of the Proposed Scheme
Table 2.4.3	Potential Indirect Construction Effects on Designated Sites (Connecting Habitats)
Table 2.4.4	Estimated Areas of Habitat Planting along the Proposed Scheme compared with Areas to be Removed
Table 2.4.5	Summary of Mitigation Proposals, Potential Impacts and Significance of Residual Effects

Section 2 Part 5: Landscape Effects

Table 2.5.1	Landscape Quality and Typical Descriptors
Table 2.5.2	Magnitude of Impact and Typical Descriptors
Table 2.5.3	Arriving at Significance of Visual Impact
Table 2.5.4	Summary of Landscape Quality and Value (or Sensitivity)
Table 2.5.5	Summary of Landscape and Townscape Effects

Section 2 Part 6: Land Use

Table 2.6.1	Criteria Used for Assessing the Magnitude of Impacts on Private Property, Development Land and Community Land
Table 2.6.2	Determining the Significance of Effects on Non-Agricultural Land Use
Table 2.6.3	Criteria for Estimating the Effect on Agricultural Farm Units
Table 2.6.4	Criteria for Assessing Significance (through MII) of Effects on Agricultural Property
Table 2.6.5	Assessment of Main Effects on Non-Agricultural Properties – Summary Table
Table 2.6.6	Assessment of Main Effects on Agricultural Properties – Summary Table

Section 2 Part 7: Noise and Vibration

Table 2.7.1	Classification of Magnitude of Noise Impact Criteria
Table 2.7.2	Traffic Modelling Results, $L_{A10, 18 \text{ hr}}$, dB
Table 2.7.3	Noise Level Assessment Summary Table
Table 2.7.4	Noise Nuisance Assessment Summary Table
Table 2.7.5	Vibration Nuisance Assessment Summary Table

Section 2 Part 8: Pedestrians, Cyclists, Equestrians and Community Effects

Table 2.8.1	TAG Significance Criteria for Assessing Changes in Community Severance
Table 2.8.2	NMU Crossing Points with Total Number of Users (12hr Weekday)
Table 2.8.3	NMU Crossing Points with Total Number of Users (12hr Weekend)
Table 2.8.4	Summary of Significance of Effects

Section 2 Part 9: Vehicle Travellers

- Table 2.9.1 Categories of Driver Stress on Dual-Carriageway Roads
- Table 2.9.2 Categories of Driver Stress on Single Carriageway Roads
- Table 2.9.3 Significance of Effects on Journey Ambience

Section 2 Part 10: Road Drainage and the Water Environment

- Table 2.10.1 Criteria for Estimating the Importance of Water Environment Attributes
- Table 2.10.2 Potential for Pollution during each Phase of a Road Development
- Table 2.10.3 Summary of Method A Assessment Results
- Table 2.10.4 Method B Assessment Results
- Table 2.10.5 Significance of Impact on Groundwater Resources
- Table 2.10.6 Method C Assessment Results Summary – 2027 Do-Something Scenario
- Table 2.10.7 Method D Assessment Results 2006 Baseline
- Table 2.10.8 Method D Assessment Results 2012 Do-Minimum
- Table 2.10.9 Method D Assessment Results 2027 Do-Something
- Table 2.10.10 Mitigated Method D results – 2027 Do-Something
- Table 2.10.11 Estimating the Magnitude of an Impact on an Attribute
- Table 2.10.12 Significance of Environmental Effects during the Construction Phase with Implementation of Mitigation Measures
- Table 2.10.13 Significance of Environmental Effects during the Operational Phase with Implementation of Mitigation Measures

Section 2 Part 11: Geology

- Table 2.11.1 Summary of Identified Contamination
- Table 2.11.2 Geological Environmental Impacts

Section 2 Part 12: Soils and Agricultural Land Quality

- Table 2.12.1 Attribute & Indicator of Quality
- Table 2.12.2 Estimating Importance of Agricultural Land Quality & Soils
- Table 2.12.3 Estimating Magnitude of an Impact on an Attribute
- Table 2.12.4 Estimating Significance of Potential Effects
- Table 2.12.5 Summary of Soil Stripping Units
- Table 2.12.6 Ranking of Importance of Land Quality and Soil Resources
- Table 2.12.7 Ranking of Magnitude of Impact on Land Quality and Soil Resources
- Table 2.12.8 Significance of Potential Effects on Land Quality and Soil Resources
- Table 2.12.9 Summary of Extent of Agricultural Land Quality Potentially Affected

Section 2 Part 13: Impact on Policies and Plans

- Table 2.13.1 Policies and Plans Summary Table

Section 3 Part 1: Cumulative Effects

- Table 3.1.1 Interactions between A453 Environmental Topics
- Table 3.1.2 Cumulative Effects on Sensitive Receptors (opening year 2012)

Section 4 Part 1: Summary of Mitigation Measures

- Table 4.1.1 Summary of Mitigation Measures

Section 4 Part 2: Summary of Effects of the Scheme

- Table 4.2.1 Summary of Effects of the Scheme
-
